ทดสอบการใช้งาน API จาก การใส่ API ที่ได้จาก OPEN ROUTER

```
[1] from openai import OpenAI

client = OpenAI(
    base_url="https://openrouter.ai/api/v1",
    api_key="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",
)

response = client.chat.completions.create(
    model="openrouter/free", # or a specific model like "google/gemma-4-31b-it:free"
    messages=[
        {"role": "user", "content": "hello? can you tell me about breakfast"}
    ],
)

print(response.choices[0].message.content)
```

... Hello! Breakfast is a great topic—it means something a little different depending on where you are, your routine, and what you enjoy. Here's a broad overview:

****What breakfast is****
The word literally means "breaking the fast" from overnight. It's the first meal of the day and traditionally helps replenish glucose, kickstart metabolism, and provide key nutrients to support focus and energy.

****Global styles****

- ****North America & Western Europe:**** Cereal, toast, eggs, bacon/sausage, oatmeal, yogurt, coffee or tea.
- ****East Asia:**** Rice congee (porridge), steamed buns, grilled fish, pickled vegetables, soy milk or tea.
- ****Latin America:**** Beans, corn tortillas, eggs, avocado, fresh fruit, café de olla or hot chocolate.
- ****Middle East & North Africa:**** Flatbreads, cheeses, olives, hummus, fava beans, strong tea or coffee.
- ****India:**** Upma, poha, parathas, idli/dosa with chutney, flatbreads, chai.

****Nutrition basics****
A balanced breakfast typically includes protein, healthy fats, fiber, and complex carbs. This combo helps stabilize blood sugar, keep you full longer, and support mental clarity. That said, needs vary widely by activity level, culture, and personal preference.

****Quick & popular options****

- Smoothies (fruit + yogurt/protein powder + greens)
- Overnight oats with nuts & fruit
- Avocado toast with a boiled egg
- Greek yogurt with granola and berries
- Scrambled or boiled eggs + whole-grain toast
- Peanut butter on toast + banana

If you're looking for something more specific—quick grab-and-go ideas, healthy balanced plates, traditional dishes from a particular country, or options for a certain diet (vegan, gluten-free, low-carb, etc.)—just let me know and I'll tailor it!

print(response.choices[0].message.content)
```

... Hey! Happy to help 🥰

Economics is basically the study of how people, businesses, and societies make choices when resources are limited. Since we can't have everything we want, economics explores how we allocate those scarce resources to get the most value.

It's usually split into two main branches:

- ◆ **Microeconomics** – Looks at individual and firm-level decisions:
 - How prices are set by supply and demand
 - Consumer behavior and utility
 - Firm production, costs, and profit maximization
 - Market structures (competitive, monopoly, oligopoly, etc.)
- ◆ **Macroeconomics** – Looks at the economy as a whole:
 - GDP (total economic output)
 - Inflation (price level changes)
 - Unemployment
 - Economic growth
 - Fiscal policy (government spending/taxing) and monetary policy (central banks, interest rates)
- 🔴 Some foundational ideas:
 - **Scarcity**: Unlimited wants vs. limited resources
 - **Opportunity Cost**: What you give up when you choose one thing over another
 - **Incentives**: People respond to rewards and penalties
 - **Supply & Demand**: The core mechanism that determines prices and quantities in markets

Economics shows up in everything from why your morning coffee costs what it does, to how central banks steer recessions, to how governments design tax systems or trade policies.

Want me to dive deeper into any of these? I can explain supply and demand curves, how GDP is calculated, the difference between Keynesian vs. Classical economics, or how economic policy affects everyday life. just say the word 🌟💡

... Hello! I'd be happy to tell you about economics. It's a broad field, so let me give you an overview:

What is Economics?

Economics is the study of how people, businesses, and societies make choices about allocating scarce resources. Since resources (like time, money, raw materials, and labor) are limited, but human wants are virtually unlimited, economics helps us understand how to make the most of what we have.

Two Main Branches

****Microeconomics**** - Studies individual decisions and markets

- How consumers decide what to buy
- How businesses set prices
- How markets work

****Macroeconomics**** - Looks at the big picture

- Economic growth and inflation
- Unemployment rates
- Government fiscal and monetary policy

Key Concepts

- ****Supply and Demand**** - The foundation of market prices
- ****Opportunity Cost**** - What you give up when making choices
- ****Scarcity**** - The basic economic problem of unlimited wants with limited resources
- ****Efficiency vs. Equity**** - Balancing optimal resource use with fair distribution

Real-World Applications

Economics explains everything from why coffee costs \$5 to why some countries are rich while others stay poor. It helps with business decisions, government policy, personal finance, and understanding global trade.

What specific aspect interests you most? I'd be glad to dive deeper into anything you'd like to explore!

- Opportunity Cost** - What you give up when making choices
- Scarcity** - The basic economic problem of unlimited wants with limited resources
- Efficiency vs. Equity** - Balancing optimal resource use with fair distribution

Real-World Applications

Economics explains everything from why coffee costs \$5 to why some countries are rich while others stay poor. It helps with business decisions, government policy, personal finance, and understanding global trade.

What specific aspect interests you most? I'd be glad to dive deeper into anything you'd like to explore!

สรุปผลลัพธ์ทั้ง 2

- **POOLSIDE LAGUNA S 2.1**: เหมาะสำหรับคนที่ชอบอ่านเนื้อหาเรียบๆ มีโครงสร้างหัวข้อชัดเจนแบบตำราเรียน
- **NVIDIA NEMOTRON 3.5 LIGHTNING**: เหมาะสำหรับคนที่ชอบการสรุปที่อ่านง่าย มีสัญลักษณ์ VISUAL ช่วยดึงสายตา แลงเสนอแนวทางเราจะงในการศึกษาต่อได้ดีกว่า

ทำความเข้าใจงาน ไฟล์งานข้อมูล **DATA**

🌀 คำตอบ ที่ AI ได้นำเสนอวิธีการทำความสะอาดมา

จากการตรวจสอบไฟล์ข้อมูลดิบพบกับปัญหาหลักที่ต้องแก้ไขและขั้นตอนข้อมูลที่แท้จริง:

- จัดการประเภทข้อผิดพลาด & ข้อความไม่สอดคล้องกัน:
 - Age : เปลี่ยนคำตัวหนังสือ แปลว่า "twenty" กลายเป็นตัวเลข 20 และแปลงเป็นประเภท Numeric
 - Gender : การเขียนคำที่พิมพ์ผิดแปลว่า "mal" → "Male", "femal" → "Female"
 - Education_Level : จัดรูปแบบให้เป็นมาตรฐานเดียวกัน (ตัวพิมพ์ใหญ่) แปลว่า "master" → "Master"
 - TikTok_Time : หลักการของบริษัท "missing" ถูกแปลงให้เป็นค่าว่าง (NaN) ตามความต้องการเป็นข้อมูลตัวเลข (Float)
 - Usage_Period : หลบ Whitespace (" ") ให้เป็น NaN และปรับ Case ในกรณีนี้หมายถึง "late night" → "Late Night"
 - Sleep_Quality : หลบ Whitespace และปรับ Case แปลว่า " Fair ", "GOOD", "poor" → "Fair", "Good", "Poor"
- ตารางค่าว่าง (Missing Values / NaNs):
 - อนุสาวรีย์ตัวเลข (Facebook_Time , Instagram_Time , , TikTok_Time , YouTube_Time): เติมด้วยค่ามัธยฐาน (Median) ของโครงสร้างระบบเดิมหรือระบุเป็นค่าว่างโครงสร้างเดิม
 - พระเจ้ารองรับข้อความ (Gender , Education_Level , , Emotion , Sleep_Quality): เติมด้วยค่าฐานนิยม (Mode) หรือกำหนดเป็น "Unknown"

คำตอบเรื่องความเหมาะสม ที่ผู้ใช้ได้ upload data ไปให้ AI วิเคราะห์มา

ประวัติไฟล์ชุดนี้ให้ AI วิเคราะห์มีประเด็นด้านความปลอดภัยและการกล่าวถึง:

- ระดับความเหมาะสม (ความเหมาะสมสูง):ชุดข้อมูลนี้เป็นข้อมูลเชิงสถิติทั่วไป (ข้อมูลการสำรวจที่ไม่ระบุชื่อ) โดยไม่มีข้อมูลระบุตัวตนบุคคลโดยตรง (Direct PII) เช่นชื่อ-นามสกุล, เลขบัตรประชาชน, เบอร์โทรศัพท์, หรืออีเมลที่จำเป็นต้องมีการแก้ไขสูงในข้อมูลส่วนตัวให้ AI ทำงาน
- แจ้งให้ทราบและผู้ผลิต:
 - นโยบายความเป็นส่วนตัวของข้อมูล: AI แบบเปิดเผยสาธารณะบางโมเดลอาจนำผู้ใช้เข้าสู่กระบวนการตรวจสอบโมเดลต่อ (Training Data)
 - คุณลักษณะที่ละเอียดอ่อน:ความเป็นไปได้ไม่มีชื่อ แต่หากนำอายุ เพศ การศึกษารวมกันในกลุ่มตัวอย่างขนาดเล็กอาจเสี่ยงต่อการเกิดการระบุตัวตนซ้ำ
- โปรดดูที่: ปิดตัวเลือกการแบ่งปันข้อมูลสำหรับการฝึกอบรมในการตั้งค่าบัญชี AI และควรตรวจสอบดูเสมอว่าข้อมูลไม่มี PII ก่อนการดำเนินการ

42		23 Female	High School	1.8	3.2	3.2	3.5	Morning		Poor
43		53 Female	Bachelor	2.9	1.2	3.7	5.4	Afternoon	Sad	Poor
44		32 Male	Bachelor	2.4	2.8	3.2	0.9	Morning	Neutral	Poor
45		18	Bachelor	0.4	2.2	4.4	0.9	Morning	Sad	Good
46		39 Male	Master	0.5	3.2	1.2	2.5	Late Night	Neutral	Good
47		28	High School	4.2	1.8	0.8	5.5		Neutral	Good
48		23 Female		2.7	1.9	1.1	0.2	Evening	Happy	
49		40 Male	Bachelor	1.9	0.7	4.9	2.5	Late Night	Sad	
50		16 Male	Master	3	1.2	0.8	5.4	Morning	Sad	
51		34 Female	High School	4.9	3.2	5.3	3.5	Late Night		Poor
52		42 Female	Bachelor	3.4		2.1	2.2			Good
53		20 Female	Bachelor	2.4	0.4	5.9	1.6		Happy	Poor
54		21 Female	High School	4.8	3.3	4.4	2.6	Morning	Happy	Good
55		58 Female	High School	4.3	1.6	0.9	1.1	Afternoon	Anxious	
56		22 Female		3	2.2	3.7	1.1	Morning		Poor
57		20 Male	Master	4.2	2.8	4.4	4	Late Night	Neutral	Poor
58		49 Male	High School	0.7	1.6	4.9	5.2	Evening	Sad	Good

ยังใ้ก้ตาม:

1. Age : แปลงข้อความ "twenty" ให้กลายเป็นตัวเลข 20.0 และปรับพิมพ์เป็นตัวเลข
2. Gender : ตัดสิ้นคำผิด "mal" → "Male", "femail" → "Female"
3. Education_Level : ป้อนปรากการเป็นรูปแบบมาตรฐานแคนนอนพิมพ์ใหญ่เช่น "master" → "Master"
4. TikTok_Time : เขียนข้อความ "missing" ให้เป็นค่า NaN เพื่อให้สามารถวิเคราะห์เชิงตัวเลขได้
5. Usage_Period : ลืม Whitespace ช่องออกและปรับ Case เช่น "late night" → "Late Night"
6. Sleep_Quality : ตัดเว้นวรรคส่วนเกิน และปรับรูปแบบเป็นมาตรฐานเดียวกัน (Good , Poor , Fair)

กฎการทำความสะอาด และ การรวม DATA ที่ AI แนะนำ

ส่วนที่ 2: กฎการทำความสะอาดและการรวม Data (ที่ AI แนะนำ)

ให้นำข้อความนี้ไปใส่ตอบในรายงานได้เลยครับ:

1. การกำหนดขอบเขต (Data Scope & Key):

- เชื่อมโยงข้อมูลสองชุดโดยอ้างอิงจากคอลัมน์ประชากรศาสตร์ เช่น Age (อายุ) และ Gender (เพศ) หรือสร้างรหัสประจำตัวผู้ตอบแบบสอบถาม (User_ID)

2. การทำความสะอาดข้อมูล (Data Cleaning Rules):

- ไฟล์สารตั้งต้นที่ 1 (Social_Media_Usage_Survey_raw.csv): แก้ไขคำผิด ("mal" → "Male"), ปรับอักขรพิมพ์เล็ก/ใหญ่ ("master" → "Master"), และเปลี่ยนค่า "missing" /ช่องว่าง ให้เป็น NaN
- ไฟล์สารตั้งต้นที่ 2 (Kaggle Dataset): ทำการ Clean ชื่อคอลัมน์ให้อยู่ในรูปแบบสั้นและเข้าใจง่าย เช่น เปลี่ยนจาก "1. What is your age?" → Age , "2. Gender" → Gender และ "3. Relationship Status" → Relationship_Status

3. การรวมข้อมูล (Merging Rule):

- ใช้การ Inner Join เชื่อมตารางด้วย Age และ Gender เพื่อวิเคราะห์เปรียบเทียบพฤติกรรมการใช้เวลาโซเชียลฟอรม กับสถานะการทำงาน/ความสัมพันธ์และระดับผลกระทบทางจิตวิทยา

ผลลัพธ์ของการรวม DATA

PROJECT: XAU POWER

อยากสร้าง Project นี้เพราะส่วนตัวเป็นนักลงทุนในทองคำอยู่แล้วและอยากพัฒนาตัวช่วยในการตัดสินใจหรือบอกเทรนด์เพื่อเอามาทดแทนสิ่งที่คนอาจจะคิดพลาดไปโดยไปถึงการคำนวณที่แม่นยำโดยไม่มีอารมณ์มาเกี่ยวข้อง

การทำงานของ APPLICATION XAU POWER

ภาพรวม & กราฟสด

AI วิเคราะห์ตลาด

จำนวน Lot & ค่าไรชาดทุน

AI ตาม-ตอบ การลงทุน

ปฏิทินข่าวทองคำ

เครื่องมือคำนวณการลงทุน & การจัดการความเสี่ยงทองคำ

คำนวณขนาดไม้เทรด (Position Sizing), อัตราส่วนค่าไรชาดทุน และแผนออมทอง

คำนวณ Lot Size & ความเสี่ยง

คำนวณ TP/SL & ค่าไรชาดทุน

จำลองออมทอง (DCA)

เงินทุนในพอร์ต (Account Balance)

\$2,000

\$ 2000

\$500 \$1000 \$2000 \$5000 \$10000

ความเสี่ยงที่ยอมรับได้ (% Risk Per Trade)

2% (\$40.00)

0.5% (อนุรักษ์นิยม) 1% - 2% (มาตรฐานสถาบัน) 5% (เสี่ยงสูง)

ระยะ Stop Loss (Pips)

40 Pips (\$4.00 ใน XAU/USD)

20 pips (\$2.0) 30 pips (\$3.0) 40 pips (\$4.0) 50 pips (\$5.0) 80 pips (\$8.0)

เลเวอเรจของบัญชี (Leverage)

1:200 (แนะนำ)

ผลลัพธ์การคำนวณ MONEY MANAGEMENT

ขนาด Lot ที่แนะนำ (Recommended Lot Size)

0.1 Lots

เทียบเท่าทองคำ 10 Troy Ounce

มูลค่าความเสี่ยงสูงสุด (\$)

\$40.00

= 0.1,370 บาท

หลักประกันที่ต้องใช้ (Margin)

\$136.84

6.8% ของพอร์ต

มูลค่าต่อ 1 Pip (Pip Value)

\$1.00 / pip

1 จุด (\$0.01) = \$0.10

Free Margin หลังเปิดไม้

\$1863.16

ความปลอดภัยสูง

ส่งค่า Lot 0.1 ไปคำนวณค่าไร/ชาดทุน

การทำงานของแอป : เราแค่ใส่ตัวเลขเงินต้นที่เรามีและความเสี่ยงที่เรายอมรับได้รวมไปถึง Leverage เพื่อให้แอปคำนวณออกมาเป็น Lot Size ที่พอเหมาะพอดีรวมไปถึงการวิเคราะห์แนวโน้มของตลาดได้อีกด้วยและยังมีการที่เราสามารถถามตอบกับแอปนั้นได้โดยถ้าเราอยากรู้เกี่ยวกับตรงไหนแอปก็สามารถตอบคำถามของคนที่เข้ามาใช้บริการได้เป็นอย่างดี

สิ่งที่อยากพัฒนาต่อ : อยากให้มีเส้นคำนวณว่าควรเข้าจุดไหนและstop loss จุดไหนเพื่อประกอบการตัดสินใจ
